

ENVIRONMENTAL POLICY

Tillery Valley Foods Ltd. specialises in the production and distribution of chilled and frozen meals. The company was established in 1984 and is situated in Abertillery, South Wales.

We recognise that our key adverse environmental impacts are through the consumption of energy, water and fuel, the use of raw materials and the generation of waste. Through the development, implementation and review of our Environmental Management System (EMS) we will identify areas for continual improvement thus reducing our adverse impacts on the environment.

Tillery Valley is fully committed to ensuring that it:

- Meets or exceeds all applicable legal and other requirements.
- Actively promotes recycling projects to reduce landfill volumes.
- Prevents pollution at source by risk assessed containment options.
- Continually works to improve its environmental performance through setting, monitoring and achieving annual environmental objectives and targets.
- Actively reduces energy, water, fuel usage and waste generation in proportion to output.
- Promotes environmental awareness and responsibilities amongst all employees.

Regular reviews and inspections will be carried out to ensure the EMS remains effective.

This policy statement is communicated to all employees, displayed for information purpose to visitors and available to all interested parties upon request. This policy will be reviewed at least annually and revised as necessary.

Simon Scrivens
Managing Director
